Android dotted line vertical. Android edittext dotted line. How to create dotted line in android. Android canvas draw dotted line. Android google maps dotted line. Android compose dotted line. Android round dotted line. Dotted line not showing in android.

I liked the solution from Ruidige, but I needed more control from XML. So I changed it to Kotlin and added attributes. 1) Copy the Kotlin class: `import android.content.Context import android.graphics.* import android.util.AttributeSet import android.view.View class DashedDividerView : View { constructor(context: Context) : this(context, null, 0) constructor(context: Context, attributeSet: AttributeSet) : this(context, attributeSet, 0) companion object { const val DIRECTION_VERTICAL = 0 const val DIRECTION_HORIZONTAL = 1 } private var dGap = 5.25f private var dWidth = 5.25f private var dColor = Color.parseColor("#EE0606") private var direction = DIRECTION_HORIZONTAL private val paint = Paint() private val path = Path() constructor(context: Context, attrs: AttributeSet?, defStyleAttr: Int) : super(context, attrs, defStyleAttr) { val typedArray = context.obtainStyledAttributes(attrs, R.styleable.DashedDividerView, defStyleAttr, R.style.DashedDividerDefault) dGap = typedArray.getDimension(R.styleable.DashedDividerView_dividerDashGap, dGap) dWidth = typedArray.getDimension(R.styleable.DashedDividerView_dividerDashWidth, dWidth) dColor = typedArray.getColor(R.styleable.DashedDividerView_dividerDashColor, dColor) direction = typedArray.getInt(R.styleable.DashedDividerView_dividerDirection, DIRECTION_HORIZONTAL) paint.color = dColor paint.style = Paint.Style.STROKE paint.pathEffect = DashPathEffect(floatArrayOf(dWidth, dGap), 0f) paint.strokeWidth = dWidth typedArray.recycle() } override fun onDraw(canvas: Canvas) { super.onDraw(canvas) path.moveTo(0f, 0f) if (direction == DIRECTION_HORIZONTAL) { path.lineTo(measuredWidth.toFloat(), 0f) } else { path.lineTo(0f, measuredHeight.toFloat()) } canvas.drawPath(path, paint) } } 2) Create an attr file in the /res directory and add this 3) Add a style to the styles file 2dp 2dp #EE0606 horizontal 4) Now you can use the default style or set attributes in XML I want to draw horizontal and vertical dotted lines in android using shapes. I want to draw like this For Horizontal line But vertical dotted line not displaying my output shows like this How to draw vertical line. Let's Solve it. This is a common error many developers questioned us about it. So we write the explanation above. You just have to apply the suggested solution to your code and it will do for you. If you still getting this error after applying this code then comment below we will get back to you with the new method. Solution 1 I found the solution Solution 2 If the View has 1dp width then just rotating your horizontal line is not enough. The vertical line's length will be 1dp as it is drawn horizontally first, then rotated. Here is a trick to solve this problem: Now, All you need to do is apply the above vertical XML into the view. Complete Code: In Layout: Solution 6 This one solves the problem nicely Create drawable line_dash.xml Solution 8 For the vertical line: Solution 9 Solution 11 This solution is 100% working and wish help you: At first create a drawable which will draw a horizontal dashed line. Let dashed line drawable name is horizontal_dashed_line.xml Now you have a horizontal and vertical dashed line. How to use: To draw horizontal line simply add horizontal_dashed_line.xml in your layout. For example:`
